Djody Rizaldi Arifin

Full Stack Web Developer | PHP · MySQL · JavaScript

Purwakarta, West Java, Indonesia | 0819-3095-5601 | djody.aripin1@gmail.com | https://djodyyy.github.io/DjodyRizaldiArifin/

PROFESSIONAL SUMMARY

Full-stack web developer with 3+ years of experience building and maintaining PHP/MySQL business applications, backed by a background in IT operations. Delivered production systems for a logistics company and a local government, including tax-aware invoicing, multi-role access control, and transaction-safe financial workflows. Seeking a full-time remote full-stack role (UTC+7).

TECHNICAL SKILLS

Backend: PHP (Native, Laravel), MySQL, REST-style CRUD, authentication and role-based access control
Frontend: HTML, CSS, JavaScript, Bootstrap, Tailwind CSS
Working knowledge: Node.js/Express, React, Git
Practices: CSRF protection, server-side authorization, database transactions and row locking, relational database design, production deployment (Hostinger), technical documentation

PROFESSIONAL EXPERIENCE

Full Stack Web Developer (Freelance) — PT Yudha Karya Barokah

Oct 2025 – July 2026

Shipment, invoicing, and payment system for a logistics company (PHP, MySQL, JavaScript, Bootstrap).

- Built a shipment management system covering shipment records, invoicing, payment processing, and financial reporting, running in production.
- Designed a split-invoice schema that produces two invoice types per shipment: a taxable "Tarif" invoice (base rate and overnight surcharge, subject to VAT) and a non-taxable "Reimburse" invoice (unloading, e-toll, and other pass-through costs).
- Implemented a dual-payment module (per-invoice and consolidated payments) with a switchable invoice view, plus PDF, Excel, and Word export and billing recaps.
- Hardened financial operations with CSRF token validation, server-side role checks, row locking to prevent race conditions, and database transactions around multi-table writes.
- Maintained a production branch on the legacy schema with incremental releases while developing the new schema on a separate branch.

Full Stack Web Developer (Freelance) — Pemerintahan Desa Cibening, Purwakarta

Jun 2025 – Juni 2026

Village administration and public information system (PHP, MySQL, JavaScript, Bootstrap).

- Developed and maintain a system covering population data and statistics, village officials, development programs, budget transparency, and public content (news, articles, galleries).
- Designed the relational database and implemented CRUD, data validation, document and image uploads, and role-based access for Admin, Village Head, and Resident roles.
- Deployed and maintain the application in production on Hostinger, including database configuration, debugging, and feature enhancements based on operational requirements.

IT Specialist — PT Metro Pearl Indonesia

Jun 2023 – Present

- Built and maintain an internal IT asset management web application (PHP, MySQL, JavaScript, Bootstrap): asset, printer and cartridge inventory, IP address management, maintenance history, role-based access, search and filters, and operational reports.
- Provide daily IT support across departments: hardware and software troubleshooting, installation and configuration of internal software, POS terminals, and network devices.
- Support MRP system users and monitor data consistency.

IT Staff — Perumda BPR Purwakarta

Aug 2022 – May 2023

- Provided technical support for banking systems and helped keep IT infrastructure stable.
- Supported the implementation and maintenance of software systems.

Earlier experience: Assistant Branchless Banking, PT Bank Negara Indonesia (Jul 2021 – Feb 2022) | Customer Service Representative, PT Smartfren Telecom (Aug – Dec 2020)

ADDITIONAL PROJECTS

Dure Family Coffee — Cafe Cashier and Inventory System (Node.js/Express, React, MySQL): web-based system for daily cafe operations, inventory, and cost calculation.

Jawara Group — MLM Sales Network System (PHP, JavaScript, MySQL, Bootstrap): product and pricing management (member vs. non-member), member registration, and sponsor/upline/downline tree structure with levels and ranks.

EDUCATION

D3 Informatics Engineering — Politeknik Pos Indonesia, 2016 – 2019 (GPA 3.08)

S1 Information Systems — Universitas Terbuka (in progress)
